

# What's Your Radiographic Diagnosis?

by  
Chris Erdman

Coming two year old quarterhorse. Not noted to be lame until animal was broken. No swelling or heat in leg. Would become lame when ridden for a short time. Lameness disappeared after day or two rest, but would recur with exercise. Answer on page 60.

# Answer to "What's Your Radiographic Diagnosis?"

"Bone Cyst" Distal end P-1. No Treatment.

## LIVESTOCK EQUIP.

**SUPER A25  
AUTOMATIC  
SELF-CATCHER**  
Available for famous  
150 Chute

The improved SUPER A25 is really automatic — Just stand behind the critter and push or pull! The critter and the spring loaded mechanism does the rest. Push the control rod the gate sets itself for critter to walk in and catch itself. Pull control rod and the critter pushes the gate open then closes itself. CHAINS OR CABLES HAVE BEEN ELIMINATED. Two quick set controls adjust for different size critters. Controlled from either side. Nose bar and head table optional. Model 21 and 21R lever type gates also available. Preferred for horned animals.

---

### LIVESTOCK HOLDING CHUTE

Available with or without removable wheels. Panels and bars let down for nearly full access to critter. 6 to 1 leverage gives lots of squeeze power. Locks positively in any position. De-horning table attaches in seconds. Opens wide to let critter through. Restraining bar standard. Head table and nose bar assembly (optional).

---

### HOG CATCHER

Hog Catcher catches and holds hogs and pigs automatically. Just set the size you want caught and the porker catches himself. A counter balance mechanism lets the hog catch himself and the more he struggles, the tighter it holds him. It will handle pigs and hogs from 50 lbs. up to your big ones. Satisfaction is guaranteed.
